AFTER

Master Bathroom and Main 2nd Floor Bath

The project is a 2-story bump out which added a walk-in pantry on the first floor and expanded the Master Bath on the second floor. Remodeling the Main Bath on the 2nd floor was also included. The Master Bath was the main focus with the goal to incorporate both a relaxing bathing area as well as spa like shower. With 2 entrances being used and having multiple users, it was also important to create a private commode area and add a second sink. The enlarged Cherry vanity, featuring a pull-out that was custom designed for a hair dryer and curling iron, is from StarMark. The linen cabinet, medicine cabinets and storage in the commode are of the same. A unique application was incorporating some cherry trim into the tile layout at the bath area with the decorative tile including glass and metal. Kohler products were used throughout: Devonshire oil rubbed bronze for faucets and shower components, Devonshire Comfort Height Toilet and Sunward 6' Bubblemassage Tub. The shower features Kohler's Watertile Body Sprays and Water Tile Rain Head along with a multi-function hand held shower, recessed tile cubbies and a toe shelf for shaving.

7722 Geralayne Circle, Wauwatosa

Directions: From Wisconsin Avenue, turn North onto 77th Street. Follow Geralayne Drive East around to Geralayne Circle to home.
